Cloud Fox A1 speaker system information

Cloud Fox A1
Preparation

Connecting the system to power
Before you set up the system on your network, connect the system to power.

1.Plug the AC power cord into the Power connector on the charging cradle.
2.Put the Cloud Fox A1 speaker on the charging cradle. Make sure the speaker and the charging cradle connect properly.
3.Plug the other end of the power cord into an AC (mains) power outlet. Recommended charging time is three hours without playing audio.

Remark: Please connect your device to 2.4GHz Router. If your router is double module, please connect your device to 2.4 GHz Wi-Fi SSID name.

Cloud Fox A1
Preparation

Setting up APP
After you connect the system to power, you must download and install the Cloud Fox App onto a smart-phone or tablet that is connected to your network.

Note: Cloud Fox offers iOS and Android App for smart-phone and tablet only. Those Apps are not work for any computer.

1.Download and install the Cloud Fox App. If this is your first time setting up a Cloud Fox system, you must download and install the Cloud Fox App.
• iOS user: Search Cloud Fox and download from App Store.
• Android user: Download from www.dossaudio.com

2.Connect the system to your home Wi-Fi network. After you install the App, add the system to your network(2.4GHz).
• On your smart-phone or tablet, select to launch the App.
• Follow the instructions in the App to complete setup.

FCC Statement:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
